DAZ, 6/26

Left Dr Jan on morning -
Henry - d. 19 upst
Dwight - bullet theory
Williams' post Feldwig account
Perry - Mark theory
2 dog pictures connected with Phillips

Alt guns
Jacks - "Ahoy" II turned + looked up
behind me" or Lemmon do it
Ron wireless
Lemmon - he not when upst
questions she, I think not consistent
with testimony
Wright misquotes Costin on upstairs
to front
Perry - person of entry - right work -
behind + not other night questions
this from impression gotten on the ride
Source of milk bottle.

2-2. Hume "reasoned" pretty
he was not the first before.
The Rather question is was
Hume shifted by differences of
temperament but to elicit us from
him but is not of a temperament.
"Hard" not to be because !!
antipathy? Some of this also
positions the question as social.
"Since that from we have type
to positivity & of prime ministers"
Why are we told, but Rather
feel a moral tone "we ought not"
The photographs homicide also
said "we ought not" - also false
Ed witness "inside hard drug
said that. Same from Russo
does not quite those who said
otherwise + how are
so wrong.

2-3 | Sparta - "just as after" in
Herman testimony.
3 bullets nothing - 12, 154 Dean
Connally at 228-9 Dean Jarrell
at 3,13 - Bent how about Tague?
Thornberry - would not tell of
bullet but knew in at.
Tague Olivia as immediate -
did not add him at - to me
how he 11 Ave 6.5 bullet crushed
penetrate blocks of galaxie to
upper chest - no wounds
at Parkland in throat as was
exist, due gloves.
One bullet could have caused all wounds;
Re shooting of bullets after CBS
don't this. Who has designed pt) other
Olivier, who has his on record to up-
hold. Do reconcile Parkland statements
time? and why none in chest?

2-4.) Trajectory of "second assassin."
"Almost identical" with those
of 10's - They do not prove the
~~the~~ trajectory of any bullet.
